

IT Consulting Services Overview

Your Partner in Enterprise Transformation

At IT People, we understand that the real management of IT is in understanding how to evolve your current IT environment to meet business needs, getting the most out of your existing IT investments, and putting smart modernization actions in place to enable maximum agility and effectiveness—all while remaining compliant and fiscally responsible. We also recognize that technology is changing and evolving fast and organizations that want to stay competitive and grow often must accelerate their adoption of modern transformative paradigms.

IT People has helped many companies to extract maximum business value and service excellence from their IT investments, including people, processes and technology. We excel at helping companies assess their IT and business landscapes, identify gaps, and develop strategies that address technology and business process evolution.

Why IT People?

Our team of consultants have more than 20 years of industry experience and are able to bring industry insights, best practices and experience to solve your business challenges, adding a great deal of business value. For example, on many strategy engagements, we have been able to identify at a minimum, 15% to 35% savings that could be achieved by implementing our recommendations to gain efficiencies.

IT People Consulting Services

Our IT consulting services can help you in numerous areas of enterprise IT transformation, including optimizing what you have, determining modernization strategies, getting a handle on Big Data and improving your operational effectiveness.

Our Strengths

- ➔ Small and lean team organization with limited overhead
- ➔ Better access, attention and agility than large vendors
- ➔ Leadership with wide industry exposure
- ➔ Consultants with the best of industry experience
- ➔ Always focused on enterprise value delivery
- ➔ Focused commitment to our people and our customers

Big Data and Analytics Services

IT Optimization Services

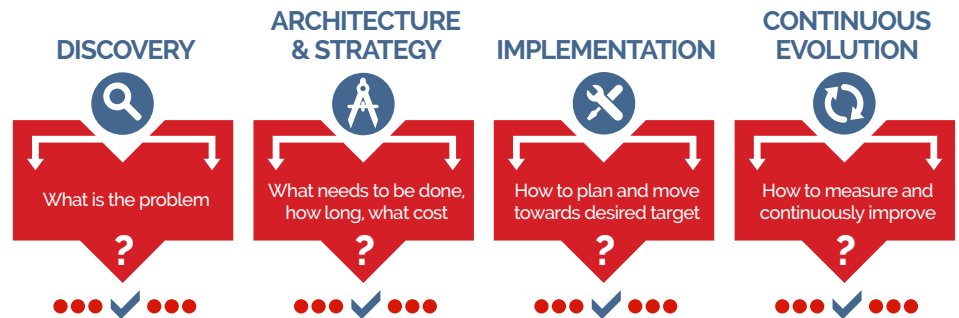

Technology Modernization Services

- ↳ Service Enablement (SOA & EDA)
- ↳ Business Process Management

Operational Excellence

- ↳ Governance Establishment
- ↳ Enterprise Architecture

The IT People Consulting Approach

IT Optimization Services

Our services focus on understanding business motivation, assisting customers to assess current state and developing strategies to exploit IT more effectively and efficiently. This includes asset management, application portfolio analysis and rationalization, infrastructure consolidation and virtualization, environment monitoring and cloud adoption.

Technology Modernization Services

We help you transition to modern technology and infrastructure stacks by applying paradigms such as SOA and EDA, legacy business rules mining, business process re-engineering, information model re-engineering, redesigning user experience and user interfaces and providing a path for business growth and agility.

Enterprise Architecture Services

We can blueprint your enterprise covering business, application, information, integration and infrastructure, and applying frameworks such as TOGAF using modern tools to effectively exploit IT assets and have better management and oversight over them.

SOA and EDA Architecture Services

We have expertise to help you adopt and migrate towards a service-oriented enterprise by building a portfolio of loosely coupled reusable business services, composable business processes and leveraging modern ESB technology to consume, monitor and manage those services.

Business Process Management Services

Business process management (BPM) focuses on improving corporate performance by managing and optimizing a company's business processes. We can build your BPM strategy, model and optimize your business processes, help select and adopt BPM technologies and gain efficiencies by reducing process errors and long cycle times.

Big Data and Analytics Services

Big Data analytics enables companies to use data sciences and gain insight about their environment, customers, partners, market strategy and product innovation, processing large varieties of voluminous data. We have partnerships and in-house expertise to help jumpstart your analytics initiatives.

IT Operational Excellence and Governance Services

Operational excellence is essential to improving delivery effectiveness and efficiency. Our expertise in establishing governance, competencies and solution delivery life-cycle methods can greatly help you in achieving those goals.

About IT People

IT People is a next-generation IT services and workforce solutions firm. We provide consulting, managed services and staffing to Fortune 500 corporations, public agencies, and small and mid-sized businesses throughout North America. Our specialties include IT modernization, infrastructure and applications optimization, and management. We enable organizations to achieve their business goals by transforming their IT processes, applications and infrastructure using the latest technologies for cloud, big data, mobile and social, and by providing them with exceptional talent when they need supplemental staff.

Our Vision and Mission

We are passionate about co-creating value with our customers and employees by offering IT services through applied thought and innovation with the commitment and integrity to deliver quality solutions on time, every time.
