IT people

Quality Assurance and Testing Services

Built-in Quality Boosts Customer Satisfaction

Our Quality Assurance and Testing practice offers a comprehensive suite of software testing that spans test planning, functional, automation, performance and specialized testing. We support both white-box and black-box testing, as well as waterfall and agile methodologies.

Our belief is that testing is not one of the phases of a project delivery, but built into every phase and starts at the very beginning of every project. We build quality upfront to reduce test cycles and costs while assuring high-quality delivery.

Why IT People?

- Immediate and flexible access to industry leading QA professionals
- Our approach to customer engagement ensures the best talent mix for expert delivery, high-quality results and cost optimization
- Global resources that accelerate operational cycle, reduce time-to-market and lower costs
- Unlimited access to talent and scalability
- A sole source for managed services; application development, support and maintenance; portal and intranet services; project management; and QA and testing services

Benefits

- Improve quality, reliability and performance
- Increase customer satisfaction
- Increase business and partner confidence
- Reduce development costs
- Accelerate time-to-market
- Spend less time fixing bugs after delivery
- Assure "fit for purpose"

IT People Quality Assurance and Testing Services

Test-Driven Development

We firmly believe in testing early and testing often. We implement continuous integration environments to support testing throughout development.

Functional Testing

We utilize testing methodology based on functional requirements. We rely on the best of automated testing tools and frameworks in addition to specialized validation by our testers.

Regression Testing

To help in early detection of showstoppers even before the QA team starts testing a particular build, we implement regression test suites and integrate them into an automated build and test process.

Performance Testing

We use proven tools and frameworks to analyze application performance variables such as stability, scalability and reliability.

Security Testing

We provide security testing for extranet applications, intranet applications, mobile applications and Web services, as defined by leading standards such as OWASP.

Compatibility Testing

Comprehensive compatibility testing to assure operation for every localization, internationalization, browser or device of intended operation.

About IT People

IT People is a next-generation IT services and workforce solutions firm. We provide consulting, managed services and staffing to Fortune 500 corporations, public agencies, and small and mid-sized businesses throughout North America. Our specialties include IT modernization, infrastructure and applications optimization, and management. We enable organizations to achieve their business goals by transforming their IT processes, applications and infrastructure using the latest technologies for cloud, big data, mobile and social, and by providing them with exceptional talent when they need supplemental staff.

Our Vision and Mission

We are passionate about co-creating value with our customers and employees by offering IT services through applied thought and innovation with the commitment and integrity to deliver quality solutions on time, every time.
