

Red Hat JBOSS/Fuse Middleware Integration Solutions from IT People

A Cost-Effective, Open-Source-Based Integration

Red Hat® is the world's leading provider of open-source solutions, using a community powered approach to provide reliable and high-performing cloud, virtualization, storage, Linux®, and JBOSS middleware technology.

Organizations tend to make large investments in integration technologies, just to discover later that the choices they made in buying the product, using it to deliver solutions or the approach taken to architecture and design were all skewed. Often, this leads to wasted time, effort and resources. Our approach and methodology has built-in controls to deal with such risks. We can work with your team to define pilots that cover a variety of areas that test:

- ➔ High availability, disaster recovery and hot deployments
- ➔ Connectivity to non-standard solutions and mainframes
- ➔ Performance across various scenarios across the network
- ➔ Service and event integration architecture

We can work with you to set up a Red Hat Middleware sand-box or pilot environment or leverage our labs which have a Red Hat Middleware solutions platform up and running. We provide mentoring and work hand-in-hand to prove out risky use-cases, and generate reports on the outcomes to make the right decisions, including suggestions on how to mix-and-match with third-party solutions.

All distributed environments have to function seamlessly, only through well-architected plumbing.

We understand how to connect disparate applications and develop solutions to react to external events in near real-time. Our team of consultants can implement service-oriented and event-driven architectures to solve such problems. With our deep understanding of Red Hat's Core Middleware platform, we deliver high performing solutions leveraging:

- ➔ Fuse Enterprise Service Bus
- ➔ Active MQ
- ➔ Business Rules Management Engine
- ➔ Business Process Management

Benefits

- ➔ An open-source integration stack based on Apache Camel
- ➔ Lower TCO based on an elastic subscription-based licensing model
- ➔ Intrinsic high availability and hot deployment capability
- ➔ Intuitive business rules engine with business process management
- ➔ Improved customer experiences
- ➔ Simplified compliance and risk management

Red Hat JBOSS/Fuse Middleware Integration Solutions from IT People

Why IT People?

- ➔ We are an authorized reseller of Red Hat Middleware products including JBOSS/Fuse, Business Rules Management System (BRMS) and Active MQ
- ➔ We provide complete solutions around the Red Hat JBOSS/Fuse Stack
- ➔ We leverage experienced Red Hat consultants well-versed in the product suite
- ➔ Our Red Hat Middleware lab in Hyderabad, India, provides facilities to execute and test proof-of-concepts and pilot projects for our clients
- ➔ Our consultants have deep experience executing projects using JBOSS Middleware stacks
- ➔ We have a pool of JBOSS/Fuse certified developers to execute local and global projects
- ➔ Our core expertise in systems integration, combined with Red Hat's open source technology makes for a winning combination

IT People Red Hat Middleware Services

Consulting

- ➔ Modernization Strategy
- ➔ Integration Architecture
- ➔ Proof-of-Concepts and Pilots
- ➔ Business Process Management Strategy
- ➔ Migration from existing middleware to Red Hat

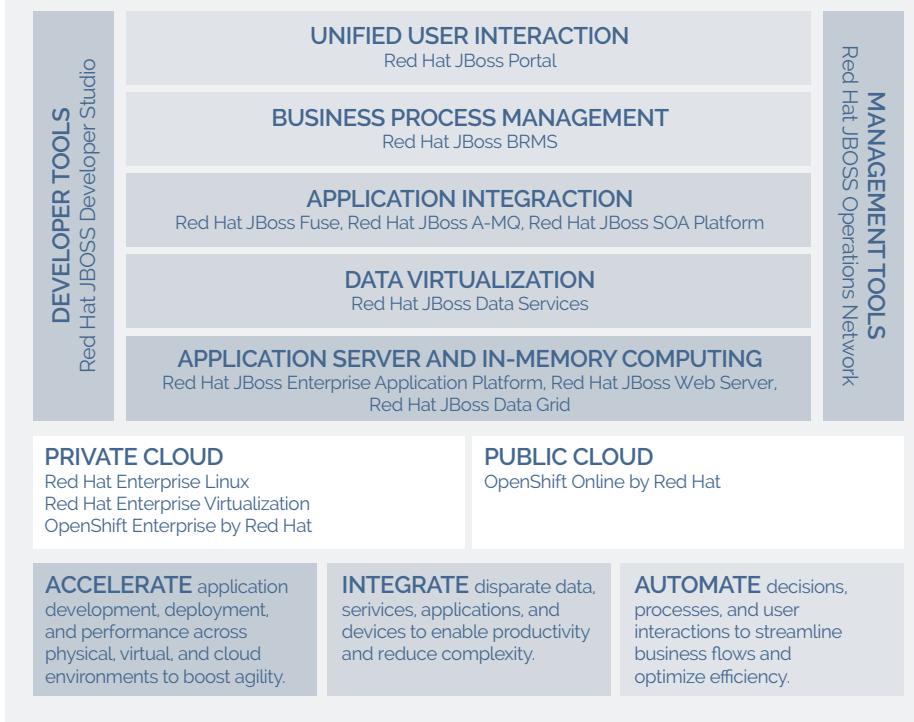

Talent Augmentation

- ➔ Red Hat Product Training
- ➔ Providing Resources Skilled in JBOSS/Fuse, Drools, BRMS, DVS, Data Grid, Active MQ
- ➔ Mentoring

Managed Services

- ➔ Project Management
- ➔ Requirements Management
- ➔ Solution Integration Design
- ➔ Implementation
- ➔ QA and Testing

Red Hat JBOSS Middleware Portfolio

About IT People

IT People is a next-generation IT services and workforce solutions firm. We provide consulting, managed services and staffing to Fortune 500 corporations, public agencies, and small and mid-sized businesses throughout North America. Our specialties include IT modernization, infrastructure and applications optimization, and management. We enable organizations to achieve their business goals by transforming their IT processes, applications and infrastructure using the latest technologies for cloud, big data, mobile and social, and by providing them with exceptional talent when they need supplemental staff.

Our Vision and Mission

We are passionate about co-creating value with our customers and employees by offering IT services through applied thought and innovation with the commitment and integrity to deliver quality solutions on time, every time.
